One-on-One Interviews

APPLY until 11 November 21, 12 pm (cover letter & CV) to messe@uni-passau.de

# Greeting

*“We hope that the Virtual Careers Day will allow you to establish contact with employers in German-speaking countries and help you take your first steps on the local job market.”*

Dear international students,

We are delighted to welcome you to the University's second Virtual Careers Day, which is at the same time the twentieth careers of the University of Passau. This year, we have the pleasure of welcoming a total of 60 companies and institutions from a wide range of business sectors to our virtual fair, so we are certain there will be opportunities for students and alumni from all of our faculties.

We are also very pleased that we can offer you an English catalogue this year – for the first time since the careers fairs began. In it, you will find all companies and institutions that have expressed an interest in hiring English-speaking talent. Please do feel free to approach these companies and institutions in English at their virtual trade fair stands.

In addition to the networking opportunities at the virtual trade fair stands, the Virtual Careers Day also offers a varied accompanying programme: In 12 presentations, you can gain insights into various professional fields and find out about topics related to job applications. One of these presentations, “Networking for Your Career in Germany”, is intended specifically for you, our English-speaking international students, and is therefore held in English. The Company Slams present an ideal opportunity to compare companies and institutions directly with each other. If you have already found an exhibiting employer who you would love to work for, you can apply for a workshop or scheduled personal interview with them in advance.

Dr. Alexandra Schick  
Head of the Centre for  
Careers and Competencies

For the first time, there will be a virtual scavenger hunt and a raffle with attractive prizes this year. We wish to thank the companies that donated the prizes and made this possible.

We hope that the Virtual Careers Day will allow you to establish contact with employers in German-speaking countries and help you take your first steps on the local job market.

We wish you all an insightful and exciting Virtual Careers Day and hope you'll make good use of it for growing your network digitally!

Friederike Winterstein  
Project Coordinator of the  
Virtual Careers Day

# The Virtual Careers Day: An Introduction

The Virtual Careers Day will take place on the University's website and its ZOOM meeting rooms. If you have registered, you will receive a special access link that will take you to the check-in area on the day of the jobs fair, 22 November 2021. You will then be able to use this link to navigate to all ZOOM meetings and contact the various companies and institutions.

Each company and institution will have its own virtual trade fair stand on ZOOM, where you can converse with their representatives. Many companies and institutions have drawn up their own agenda for their ZOOM space, e.g. with talks, company presentations, etc. We have summarized these agendas in a ZOOM daily agenda, which you can access at [www.uni-passau.de/cmc](http://www.uni-passau.de/cmc). We recommend that you check this out even if you don't speak German, as some of the offers are in English. Moreover, as part of the general Virtual Careers Day programme, there will be various presentations, workshops, company slams and personal interviews throughout the day.

Since the Virtual Careers Day is intended primarily for students and other university members, the link to the check-in area will be posted in Stud.IP under course code 65301. Please sign up for this to stay up to date on any new announcements and to receive the link to the Virtual Careers Day platform on 22 November.

Registering for the Virtual Careers Day is doubly worthwhile: We will be holding a raffle among all persons registered on Stud.IP (code 65301), and the main prize is a dinner in a local restaurant.

If you'd like to participate but don't have Stud.IP access, e.g. because you've already graduated, please send an e-mail to the Centre for Careers and Competencies at [messe@uni-passau.de](mailto:messe@uni-passau.de), and we will send you the access link.

AIESEC is an international, youth-led not-for-profit organisation which aims at encouraging inter-cultural exchange and integrating young people in an international network. For this, AIESEC in Passau offers interesting projects such as internships or social projects abroad which range within a wide portfolio of different tasks and locations. Therefore, our organisation gives students the opportunity to gain valueable experience abroad, improve their language skills and put the learnt theories into practical application. As a result, AIESEC enables young people to make their dream of a stay abroad come true and furthermore enables them in developing their potential and in becoming the leaders of tomorrow.

|   |

| Worldwide, in more than 120 countries and regions   |
| As an organisation, which is located in more than 120 countries and regions, internationality plays a significant role. Therefore, our main spoken language is English. |
| AIESEC offers young people the opportunity to improve their hard- as well as their soft skills beyond their comfort zone.   |
| During their internships or social projects, students are offered enough opportunities to travel the country and build up international friendships.                    |

BASF Construction Additives Gmbh is a BASF Group company. It has 350 employees and produces more than 220 different products that improve the suitability of construction materials for processing and enhance their durability. These range from additives for filling compounds, plasters and mortars, to products for use in oil and natural gas production, especially for drilling fluids and deep drilling cementation. As part of BASF’s research Verbund (network), specialists, scientists and researchers work at the research and development center at the Trostberg site, performing fundamental research and developing products in the construction chemicals, oilfield chemicals and mining chemicals segments.

HOW TO APPLY

We are a strong, young team of developers who are familiar with all modern technologies.

We develop flexible digital software solutions for your business.

If it's web applications, apps or plugins for existing software. We can manage that. We don't just want to digitize, we want to understand, optimize and improve processes.

We not only want to develop our product further, but also ourselves. We have already made it onto the market, now we want to stay there.

With us you will find yourself in a diverse, creative and great team.
