

The **University of Passau** owes its strong visibility and good reputation to excellent research, innovative teaching and its tight-knit international academic networks. Some 13,000 students and more than 1,100 staff study and work on our University campus, which is located a stone's throw from the historical Old Town of Passau and combines state-of-the-art technical infrastructure with award-winning architecture. Internationally successful high-tech companies and a vibrant start-up scene, coupled with a rich culture and Lower Bavarian traditions, give Passau and the surrounding area a special appeal that makes it a great place to live and work.

The **Faculty of Computer Science and Mathematics** at the University of Passau invites applications for the civil-service post of:

Professorship of Mathematical Data Science

offered either as a W1 tenure-track professorship (6-year fixed-term position with an option on a tenured W3 post) or a full W3 professorship with tenure

This post is available to start immediately. Candidates must have a strong record of original scientific research, with international impact, in the field of **mathematical statistics** with a research focus on the **mathematical analysis of computationally intensive methods from high-dimensional statistics or from machine learning**.

The postholder will represent the full breadth of the subject in research and teaching. His or her teaching will include contributions to the B.Sc. Mathematics and the English-taught M.Sc. Computational Mathematics programmes, as well as statistics modules in the faculty's computer science programmes, of which some are English-taught. The teaching load is five contact teaching hours per week for the W1 tenure-track post or nine for the tenured W3 post. High-quality publications, evidence of teaching excellence and the ability to teach in English are essential selection criteria for both career paths. Moreover, for the tenured W3 career path, candidates are expected to show evidence of successful acquisition of external ('third-party') funds from German and/or international donor organisations, independent teaching activities and integration into an international research environment. A willingness to cooperate within the faculty and with industrial partners is welcome.

In Bavaria, 'Juniorprofessor' positions (pay grade W1) are civil service posts with a fixed term of three years in the first phase (in German: 'Beamter auf Zeit'). Following a positive evaluation, an extension to a total of six years is envisaged (cf. art. 15(1) Bavarian Higher Education Employment Act, BayHSchPG).

Research and teaching at the University of Passau are focused on the guiding theme of Digitalisation, Networked Society and (Internet) Cultures. A willingness for inter-faculty cooperation within the framework of the guiding theme as well as substantial contributions to internationally visible research at the University of Passau are desired.

The **Faculty of Computer Science and Mathematics** is particularly strong in terms of external funds acquired and in the number of scientific publications; furthermore, it enjoys an excellent worldwide standing for its research output, and its teaching quality is proven by the outstanding results achieved in German university rankings. In order to meet the diverse challenges of a dynamic research landscape, the faculty has the following core competencies: algorithmically oriented mathematics and theoretical computer science as a

formal, theoretical foundation; and computer science with a focus on software, information systems and IT security for the implementation of theoretical principles in a wide range of application areas.

The successful candidate will be educated to doctoral level and—if applying directly for the W3 tenured position—either possess a formal postdoctoral qualification, such as the German 'Habilitation', or equivalent academic achievements garnered within or outside the higher education system or as part of a prior assistant professor or comparable role (e.g. German 'Juniorprofessur'). He or she will have demonstrated pedagogical aptitude and academic excellence, the latter being generally established on the basis of the quality of his/her doctoral research and subsequent achievements, as applicable; for applicants for the W1 tenure track, the appointments committee will be looking for a doctoral thesis of exceptional quality. In accordance with art. 10(3)(1) of the Bavarian Higher Education Employment Act (BayHSchPG), candidates must not be more than 52 years of age at the time of their appointment.

Any periods of employment as research assistants or graduate research or teaching assistants (German job title: 'Wissenschaftlicher Mitarbeiter', 'Wissenschaftliche Mitarbeiterin' or 'Wissenschaftliche Hilfskraft') before or after the doctoral qualification phase will be counted towards the time limit under art. 14(3) of the Bavarian Higher Education Employment Act (BayHSchPG): candidates must not have spent more than six years cumulatively in the doctoral and employment phase when applying for the W1 post. This period is extended as appropriate by any periods of maternity leave, parental leave etc.

The tenure-track career path is prescribed in the [tenure track statutes \(German text\)](#), which include provisions on quality assurance structures, procedures and standards. All professorships advertised as 'tenure track' by the University of Passau are binding for the University: following a positive evaluation of the postholder's work during the term of the initial professorship, the subsequent tenured post must be offered to him or her and cannot be withheld for extraneous reasons ('true tenure track'). This concept requires that candidates for this career path have completed a doctorate at a university other than the University of Passau and/or have worked in an academic position outside the University of Passau for a minimum of two years.

The University of Passau actively promotes equal opportunities for all genders as well as diversity in the workforce; therefore, applications are welcome from all candidates who fulfil the requisite qualifications, without regard to gender, cultural or social background, religion, world view, disability or sexual identity. As the University of Passau wishes to raise the proportion of women in research and teaching, female academics are expressly encouraged to apply. This post may be available part-time, provided a suitable number of candidates are willing to work on a work-share basis. Furthermore, this post is suitable for those with severe disabilities. Registered disabled persons are given preference over non-disabled applicants who do not otherwise have statutory preferential status if their overall personal aptitudes, skills and qualifications are equal.

To be considered, your application must reach the University by **15 April 2020**. Your full application should include all relevant supporting documents (curriculum vitae, list of publications, teaching assignments, teaching evaluations etc.) and should preferably be sent by e-mail to dekanat@fim.uni-passau.de. It should be addressed to the Dean of the Faculty of Computer Science and Mathematics, Professor Michael Granitzer, 94030 Passau, Germany. When e-mailing your application, all application documents should be attached in a *single pdf file*. Please indicate whether you are applying for the W3 position or

the W1 tenure-track position. E-mailed applications are kept on file for six months after the conclusion of the appointment procedure, whereupon they are deleted from our systems.
