The University of Passau owes its strong visibility and good repute to excellent research, innovative teaching and its tight-knit international academic networks. Some 13,000 students and more than 1,200 staff study and work on our University campus, which is located a stone’s throw from the historical Old Town of Passau and combines state-of-the-art technical infrastructure with award-winning architecture. Internationally successful high-tech companies and a vibrant start-up scene, coupled with a rich culture and Lower Bavarian traditions, give Passau and the surrounding area a special appeal that makes it a great place to live and work.

As part of the Hightech Agenda Bayern initiative of the State of Bavaria, the University of Passau is consistently expanding its long-term focus areas 'Digitalisation, 'Networked Society' and 'Europe', particularly in the area of artificial intelligence and its implications. This expansion includes interdisciplinary research and teaching foci at the interface between digital transformation; methods of knowledge generation and decision support; economic, cultural and social interactions of artificial intelligence; and basic research in mathematics and computer science. All those involved collaborate across academic disciplines and/or faculty boundaries with a critically reflective mindset, contributing their methodological know-how and applying their subject expertise.

The Faculty of Computer Science and Mathematics at the University of Passau invites applications for the civil-service post of:

Chair of AI Engineering (pay grade W3)

This post is available to start immediately. Applicants should have an excellent international track record in research at the intersection of software engineering and artificial intelligence. Possible research areas include the following:

- Development processes for AI systems
- Generating test data and adversarial examples
- Verification and testing of AI systems
- Debugging and repairing AI systems
- Specification of, and compliance with, standards and user requirements
- Development methods for guaranteeing robustness and reliability
- Compiler infrastructure for machine learning
- Reproducibility of machine learning approaches
- Modularization of machine learning models

The Chair is of central importance to the Faculty of Computer Science and Mathematics in the scope of the establishment of the new key research focus on AI and sustainability, and contribution to this research focus is essential. Collaboration with the existing Chairs of Software Engineering and Data Science is desired. The Chair plays a central role in the Bavarian AI network and should therefore be prepared to cooperate with other hubs such as Würzburg as well as members of the Künstliche Intelligenz in der betrieblichen Wertschöpfung und Innovation network.

The postholder will represent their field in research and teaching. Teaching duties encompass substantial contributions to the bachelor’s and master’s programmes of the faculty. In addition to contributing to the B.Sc. Computer Science, B.Sc. Internet Computing and M.Sc. Computer
Science, the Chair is expected to play a central role in the creation of the new M.Sc. AI Engineering degree programme. An excellent publication track, a strong track record in the acquisition of external (third-party) funds and the potential for research collaborations within the Faculty of Computer Science and Mathematics are important selection criteria.

Research and teaching at the University of Passau are focused on the guiding theme of Digitalisation, Networked Society and (Internet) Cultures. A willingness for inter-faculty cooperation within the framework of the guiding theme as well as substantial contributions to internationally visible research at the University of Passau are desired.

The Faculty of Computer Science and Mathematics is particularly strong in terms of external funds acquired and in the number of scientific publications; furthermore, it enjoys an excellent worldwide standing for its research output, and its teaching quality is proven by the outstanding results achieved in German university rankings. In order to meet the diverse challenges of a dynamic research landscape, the faculty has the following core competencies: algorithmically oriented mathematics and theoretical computer science as a formal, theoretical foundation; and computer science with a focus on software, information systems and IT security for the implementation of theoretical principles in a wide range of application areas.

The successful applicant will be educated to doctoral level and either possess a formal postdoctoral qualification, such as the German 'Habilitation', or equivalent academic achievements garnered within or outside the higher education system or as part of a prior assistant professor or comparable role (e.g. German 'Juniorprofessur'). He or she will have demonstrated pedagogical aptitude and academic excellence, the latter being generally established on the basis of the quality of his/her doctoral research and subsequent achievements, as applicable. In accordance with art. 10(3)(1) of the Bavarian higher education employment act (BayHSchPG), candidates must not be more than 52 years of age at the time of their appointment.

The University of Passau actively promotes equal opportunities for all genders as well as diversity in the workforce; therefore, applications are welcome from all candidates who fulfil the requisite qualifications, without regard to gender, cultural or social background, religion, world view, disability or sexual identity. As the University of Passau wishes to raise the proportion of women in research and teaching, female academics are expressly encouraged to apply. This post may be available part-time, provided a suitable number of candidates are willing to work on a work-share basis. Furthermore, this post is suitable for those with severe disabilities. Registered disabled persons are given preference over non-disabled applicants who do not otherwise have statutory preferential status if their overall personal aptitudes, skills and qualifications are equal.

To be considered, your application must reach the University by 10 January 2021. Your full application should include all relevant supporting documents (curriculum vitae, list of publications, teaching assignments etc.) and should preferably be sent by e-mail to dekanat@fim.uni-passau.de. It should be addressed to the Dean of the Faculty of Computer Science and Mathematics of the University of Passau, Innstr. 33, 94032 Passau, Germany. When e-mailing your application, all application documents should be attached as a single pdf file. E-mailed applications are kept on file for six months after the conclusion of the appointment procedure, whereupon they are deleted from our systems.
