

ment. Please note that you may incur a cost if you go to a different hospital for your treatment than the one indicated on the referral.

Hospital agreement

If you have to stay in a hospital for treatment for several days, you will make an agreement with the hospital. In most cases, the agreement is made in writing. This means that both you and the hospital will sign. Only sign the agreement if you have understood it and ask to be given a copy. Please ask for clarification if anything is unclear.

Emergencies

An emergency is any life-threatening illness or injury for which you need immediate medical care. Emergencies include high fever, broken bones, head injuries, strong bleeding, shortness of breath, poisoning and loss of consciousness. Please do not call the emergency headline if you do not have an emergency as you are delaying and impeding the response to real emergencies.

If you think a situation is life-threatening, for example, after a severe accident, call the emergency services ('Rettungsdienst') by dialling 112. Explain calmly and clearly where the affected person is located, what has happened and what state the person is in. Listen attentively and answer all questions as well as you can.

If you need medical advice outside of opening hours and can't wait to reach your family doctor, contact the on-call medical service ('ärztlicher Bereitschaftsdienst') by dialling 116117. This number works without a prefix throughout Germany and is free of charge. You will be connected to the on-call medical service in your area.
